PROJECTS

Natours – Full-Stack Tour Booking Platform [Code] [Live Demo] React.js, Node.js, Express.js, MongoDB

- Built a full-stack travel booking platform using **React.js, Node.js, Express.js, MongoDB, and Mongoose**, integrating frontend and backend through REST APIs.
- Implemented authentication, protected routes, CRUD operations, validation, error handling, and backend business logic using **Express.js and Mongoose**.
- Implemented a complete **document verification lifecycle** for travel bookings, enabling users and administrators to track document submission, verification, and processing status.
- Built a **near real-time client–admin communication workflow** using email notifications for booking updates, document verification, status changes, and important customer actions.
- Implemented real **Customer Care services** with dedicated **Consultant Queries** and **Booking Queries** workflows, allowing customers to submit requests and enabling administrators to manage and resolve queries.
- Integrated booking and payment workflows with backend APIs and implemented document upload functionality using cloud storage.

GATE Prep - Full-Stack ONE GATE Platform [Code] [Live Demo] TypeScript, Node.js, Express.js, MongoDB

- Built a full-stack study management platform for GATE aspirants with a **React 19 and TypeScript frontend and a Node.js and Express.js REST API backend.**
- Developed priority-ranked learning queues and a spaced-repetition revision engine that schedules chapter reviews at configurable intervals and tracks due, overdue, upcoming, and completed revisions.
- Implemented a searchable PYQ question bank and focus queue covering **10,000+ questions**, with **filters for year, subject, chapter, format, marks, status, and difficulty** , added step-by-step solutions and practice-cycle tracking.
- Created mock exam tracking and diagnostic **analytics for full-length, subject, and topic tests, calculating net score, accuracy, negative marking, score progression, and weak topics.**
- Implemented **JWT authentication, bcrypt password hashing, guest access, protected REST endpoints, user-isolated study data, and cross-tab session synchronization.**
- Added syllabus template import, interactive study calendar, and light and dark themes; **documented persistent storage using and MongoDB/Mongoose.**

SKILLS

Languages: Java, JavaScript (ES6+), Python, SQL, HTML, CSS

Frontend: React.js, Component-Based Architecture, React Query, Redux Toolkit, Styled Components, Tailwind CSS, Bootstrap 5, React Router, Form Handling, State Management

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Authorization, CRUD Operations, XSS Protection, CORS, Secure HTTP Headers, Password Hashing, Protected Routes

Databases: MongoDB, Mongoose, MySQL , SQLITE , PostgreSQL

Tools: Git, GitHub

Concepts: OOPS, Data Structures, DBMS, CN , OS

EDUCATION

LJ University 2024 – 2028
Bachelor of Engineering in Computer Engineering Ahmedabad, India

- **CGPA: 9.24**
